SUMMARY

AI and Automation Engineer specializing in building production-grade AI systems using LLMs, vector databases, and workflow orchestration. Experienced in designing end-to-end Generative AI and automation pipelines that transform unstructured data and manual processes into scalable, intelligent solutions. Proficient in developing real-world GenAI products including AI coaching platforms, RAG architectures, and business automation workflows using n8n, LangChain, and modern AI frameworks.

EXPERIENCE

Artificial Intelligence Engineer

CoreTech Innovations

08/2025 - 09/2025 Hyderabad, Sindh, Pakistan

AI and Automation engineering company specializing in innovative tech solutions

- Developed ML models for sentiment analysis and student marks prediction using Python, Scikit-learn, and TensorFlow.
- Built a smart service platform to streamline workflows and boost productivity.
- Handled data preprocessing, feature engineering, model evaluation, and optimization for production-ready solutions.
- Collaborated in Agile teams and communicated insights to drive data-informed business decisions.

EDUCATION

Bachelor of Science in Information Technology

Quaid-e-Awam University of Engineering, Sciences and Technology

12/2021 - 08/2025 Nawabshah, Pakistan

SKILLS

Python	JavaScript	SQL	N8N	LangChain	RAG
Prompt Engineering	ChromaDB	Pinecone	Hugging Face		
LLaMA	OpenAI	Google Gemini	Transformers	NLTK	
Scikit-learn	TensorFlow	Keras	OpenCV	Flask	
Streamlit	Node JS	React JS	SQLite	PostgreSQL	
MongoDB	Git	GitHub	Visual Studio Code	Anaconda	
Jupyter Notebook	Google Colab	Docker (Basic)			
AWS (Basic)					

CERTIFICATION

Google AI Essentials	Introduction to Generative AI
Google Prompting Essentials	

PROJECTS

FredCoach - AI Coaching Platform

10/2025 - 11/2025

Full-Stack AI Coaching SaaS Platform

- Full-stack SaaS delivering 24/7 AI mental coaching via GPT-4o chatbot, leveraging RAG with ChromaDB as the vector database.
- Built with Node.js, Express, MongoDB, React, and Tailwind CSS.
- Integrated Stripe for secure subscription management and developed a comprehensive admin panel for user management, analytics, and platform customization.

Content Examiner - AI-Powered Plagiarism Detection System (FYP)

02/2025 - 06/2025

Final year project focused on plagiarism detection.

- Modular Flask + React app detecting semantic & lexical plagiarism using TF-IDF, cosine similarity, and RoBERTa for sentence-level semantic analysis.
- Supports document uploads, AI-generated text detection, and PDF reporting with optimized NLP preprocessing (tokenization, lemmatization, stop-word removal) to enhance accuracy and reduce analysis noise.

Document Ingestion and Vectorization Pipeline

01/2026 - 01/2026

Document Ingestion and Vectorization Pipeline using n8n, Google Gemini, Pinecone.

- End-to-end n8n workflow fetching files from Google Drive, embedding with Google Gemini, and indexing in Pinecone for semantic search and RAG applications.
- Scalable automation integrating LLMs, vector stores, and cloud storage.

Live Object Detection with YOLOv8

08/2024 - 09/2024

Live Object Detection with YOLOv8

- Real-time multi-class object detection with Flask, OpenCV, YOLOv8.
- Features webcam feed, live predictions, bounding boxes, confidence scoring, and low-latency inference in a web interface.

LinkedIn Lead Outreach Automation

12/2025 - 12/2025

LinkedIn Lead Outreach Automation using n8n, LangChain, Google Gemini, and Google Sheets.

- Built AI driven business automation workflow generating personalized outreach emails from Google Sheets data.
- Integrated LangChain with Gemini for intelligent email generation based on lead profiles and business context outreach.
